CompareMate

Practical Apps

Document Compare Tool for Professionals

We at Practical Apps would like to thank you for evaluating **CompareMate™**! This easy-to-use Windows application assists busy professionals with the tedious task of comparing different, but similar electronic documents.

CompareMate displays document differences in a clear, intuitive way and a redlined view can be generated with the click of a button – a feature that is especially useful for professionals dealing with legal or contractual documents. Graphical navigation controls in the program provide a convenient way for the user to review document differences.

Features

- Microsoft® Word or Office are **not** required (unlike competing products).
- CompareMate is **Fast** – a result of our highly-optimized compare algorithms.
- Supports .doc, .rtf, .txt and other formats.
- Compare documents of different types. For example, compare a Word document to a RTF document.
- Convenient, side-by-side view of two documents.
- View a redline representation of the differences between the two compared documents.
- See relative positions of differences in the compared documents using the diffbar feature of the program.
- Save opened documents in several different document formats– *including the redline document!*
- Navigate through differences in the compared documents using VCR style buttons or by clicking directly on the color coded diffbar.
- Customizable user options for difference coloring and highlighting.
- Advanced setting for choice of compare algorithms ensures ability to get the best performance based on your document characteristics.
- Advance pattern recognition technology ensures that differences detected in the documents are rendered in a visually intuitive way for display to the user.

Supported Formats

- Microsoft® Word (DOC)
- Rich Text Format (RTF)
- Extensible Markup Language (XML)
- Text Files (TXT)
- Hypertext Markup Language (HTM, HTML)
- Other ASCII-format files

The Case for CompareMate

Identifying changes between two versions of a document can be a massive time sink. Microsoft® Word includes a "track changes" feature, but it's only useful if it was turned on *during document revision* – it's of little use after the fact in comparing to document version. Finding changes manually is tedious and error-prone.

CompareMate addresses this challenge and does it cost-effectively - *competing products cost more or require that you have a copy of Word* on every machine **or both!**

CompareMate is designed with the professional user in mind. We've built it from the ground up for use by people dealing with legal documents, contracts, and other documents where revisions made over time by multiple parties need to be identified.

CompareMate**™** is a product by SyndromSoft, LLC and is sold and marketed through Practical Apps

"Finally, a redlining program that works well and is reasonably priced for the small office"

- Becky Lambeth,
   Member/Partner Lambeth & Berliner, LLC

Requirements

- Windows® XP or 2000 PC
- 800MHz Pentium equivalent or better
- 256MB RAM
- 30MB available hard disk space

Support

Every purchase of CompareMate includes 30 days of free support through our online support ticket submission system.
